

We've spared no expense  
**for a truly full-service CDMO.**

At the end of a major investment programme, Indena has now **completed its CDMO offering**. Currently in full operation is the **high containment facility**, which can handle HPAPIs of synthetic, natural or fermented origin with an OEL as low as **20ng/m<sup>3</sup>**, a further extension of Indena's well-established HPAPI manufacturing capacity.

Other state-of-the-art technologies now on stream include **organic solvent spray dryers**, a GMP **pilot pharmaceutical plant** and a multipurpose **fermentation department** for toxic compounds. So if you're looking for the ideal partner for contract development and manufacturing, Indena is the natural place to go.
