

CUSTOM DEVELOPMENT SERVICE

HEALTH IS A JOINT PROJECT

We offer custom development by leveraging the expertise of a specialized team devoted to designing and developing processes and analytical methods. We are also dedicated to reaching your development milestones for botanical, synthetic and microbial fermentation projects, thanks to more than 100 years of experience in delivering complex APIs. Our collaboration model is based on mutual commitment and trust upholding the highest standards. We are fully engaged in providing bespoke services that meet our partners' specific timelines for the launch and future commercial manufacturing of their products.

100 YEARS OF BOTANICAL EXCELLENCE
