

PUREBKALE™ BRASSICA OLERACEA SEED EXTRACT

PURIFICATION, THE SOURCE OF HEALTH

PureBKale™ is an innovative food-grade extract that can support the body's detoxification and promote healthy-looking skin. After meticulously screening dozens of black kale varieties – all part of the *Brassicaceae* family, renowned for its beneficial nutrients – Indena has identified the optimal source to achieve a uniquely high glucoraphanin concentration ($\geq 17\%$), using exclusively water as solvent, relying on a trusted Italian supplier. Developed with strong commitment to sustainability, PureBKale™ is produced in an ISO 14001 and ISO 45001-certified plant where CO₂ emissions are reduced, the energy transition is underway, and occupational health and safety are a priority. Harness the power of nature, for beauty that starts from within.
