

INDENA TO UNVEIL NATURAL INGREDIENTS FOR HEALTHY AGING AT SUPPLY SIDE GLOBAL 2025: NAVIGATING THE HEALTHSPAN REVOLUTION FOR A TIMELESS QUALITY OF LIFE

Milan, October 29th, 2025 – Indena, the global leader producer of high quality innovative botanical derivatives for the pharmaceutical and botanical industry, announces its participation at Supply Side Global 2025 and invites attendees to visit their **booth 4565**, on October 29th and 30th at Las Vegas, Mandalay Bay (Expo Hall), to explore its **innovative portfolio of natural ingredients designed to support healthy aging** and enhance the human healthspan.

The global population is increasingly focused on not just living longer, but living better – a concept at the heart of the "healthspan revolution". This paradigm shift emphasizes maintaining vitality, cognitive function, physical mobility, and overall well-being throughout life. Indena stands at the forefront of this movement, leveraging decades of scientific research and botanical expertise to develop natural solutions that address the multiple challenges of aging.

*"We are witnessing a profound shift in consumer demand towards solutions that support a vibrant and active life at every age. At Indena, we believe natural ingredients, backed by robust science, are pivotal in address healthy aging needs - says **Cosimo Palumbo, Chief Operating Office Indena USA** - We are excited to present our latest innovations and new findings at Supply Side Global 2025 and demonstrate how our ingredients can help our partners deliver on the promise of healthy aging, contributing to a truly timeless quality of life for individuals worldwide. From healthy appearance of skin to body function and cellular aging, Indena's portfolio offers scientifically validated botanical extracts to create effective and trusted products for consumers seeking a natural support to live well and age better."*

INDENA'S NATURAL INGREDIENTS TO LIVE FULLY AND AGE GRACEFULLY

Indena's research into "healthy aging" support focuses on cellular aging, body function, and healthy appearance. Effectively managing these aspects is crucial for a healthy longevity, and Indena offers specific natural ingredients, validated through rigorous scientific studies. We are proud to say that people's golden aging starts today, thanks to Indena's innovative products.

*"The most recent product Indena developed for healthy aging support is [**PUREBKALE™**](#), Indena's Brassica oleracea seed extract, which helps maintaining the healthy appearance of skin, thanks to anti-oxidant and detox action – explains **Serena Tongiani, Chief Portfolio Officer at Indena** -. It is an aqueous dry extract from Brassica oleracea seeds, containing highly bioaccessible glucoraphanin — the natural precursor to sulforaphane (SFN). SFN bolsters the body's antioxidant defenses, shielding the skin from both oxidative stress and UV-induced damage. This fosters a visibly smoother, more radiant, and youthful complexion. Sourced from a 100% Italian supply chain, Indena's raw material benefits from sustainable cultivation practices, resulting in superior biomass quality.*

In addition to Purebkale™, other flagship Indena ingredients such as UBIQSOME® and QUERCEFIT® have also demonstrated significant efficacy in supporting healthy aging.

[**UBIQSOME®**](#), CoQ10 Indena Phytosome®, energizes body function right from its cellular foundation, improving strength and performance. Thanks to Indena Phytosome® technology, it promotes efficient delivery of coenzyme Q10 to target cells. UBIQSOME® supports energy, skin health, and cardiovascular health.

[**QUERCEFIT®**](#), Quercetin Indena Phytosome®, counteracts cellular aging to protect human innermost health and functionality. It is a nutraceutical ingredient formulated with the proprietary Indena Phytosome® technology, enhancing the benefits of quercetin, and has proven effective in managing cellular aging, or senescence – a cellular stress response triggered by exogenous insults (e.g., oxidative stress, toxic compounds, virus-infections) and physiological processes like aging.

Both UBIQSOME® and QUERCEFIT® are formulated with the proprietary Indena Phytosome® delivery system, the original, multi-talented technology platform Indena designed to unlock the full power of phytonutrients. The key to this unparalleled advancement is an innovative formulation made by Indena: a solid dispersion of botanical compounds within a natural lecithin-based, 100% food-grade matrix. This approach profoundly improves the stability and solubility of phytonutrients, ensuring their maximum efficacy for human well-being.

EXPLORING THE SCIENCE BEHIND INDENA'S INGREDIENTS AT SUPPLY SIDE GLOBAL

To delve deeper into the scientific aspects and efficacy of Indena's healthy aging products, attendees are invited to a special presentation by **Serena Tongiani, Chief Portfolio Officer at Indena**, on October 29th. Her session, titled *"Age better, a journey that starts with nature"*, will explore the robust science underpinning Indena's innovative solutions. Furthermore, on the same day, Serena Tongiani will participate in the panel discussion *"The GLP-1 effect: Developing healthy solutions to fill nutrition and metabolic wellness gaps"* where she will share insights on how natural ingredients can play a crucial role in addressing and managing potential side effects associated with GLP-1 therapies. Indena's portfolio for this health need includes, among others, BERBEVIS® (Berberine Indena Phytosome®), VAZGUARD® (Bergamot Indena Phytosome®), MERIVA® (Curcumin Indena Phytosome®), PRODIGEST® (Artichoke leaves + ginger root extract).

EMBEDDING SUSTAINABILITY FOR ENDURING VALUE

Indena's unwavering commitment to sustainability is woven into the fabric of its operations, guiding every aspect from sourcing to production. This dedication is exemplified by rigorous, fully traceable supply chain management, ensuring premium botanical raw materials through Good Agricultural Practices. Beyond product quality, Indena prioritizes its people, fostering a supportive work environment with high employee retention and ISO 45001 certification for occupational health and safety. Environmentally, all European plants are ISO 14001 certified, reflecting efforts to optimize natural resource use. Looking ahead, Indena is significantly investing in renewable energy, aiming for 4MW of photovoltaic power by 2026 and a target of 80% renewable electricity by 2030, underscoring its holistic approach to a positive impact.

DON'T MISS INDENA'S PRESENTATION

Dr. Serena Tongiani, Chief Portfolio Officer at Indena, will attend the round table *The GLP-1 effect: Developing healthy solutions to fill nutrition and metabolic wellness gaps*.

October 29, 2:15 PM to 3:15 PM, Supplement Solutions Stage, Booth #957, Shoreline, Level 2

Dr. Serena Tongiani will also give a presentation titled *Age better, a journey that starts with nature*.

October 29, 3:30 PM to 3:50 PM, Product Development Theater, Booth #8011, Bayside B, Level 1

VISIT INDENA AT SUPPLY SIDE GLOBAL 2025: BOOTH 4565

October 29th-30th, 2025 – Mandalay Bay – Expo Hall, Las Vegas

Indena is the leading company dedicated to the identification, development and production of high-quality active principles derived from plants, for use in the pharmaceutical and health food industries. Backed up by a century of botanical experience, the company owns 100 patent families, has published more than one thousand scientific studies, and co-operates with the world's most prestigious universities and private research institutions. Indena employs over 900 staff, investing a significant amount of its annual turnover in research, making this activity the key to its success. Headquartered in Milan, Indena has 4 production sites and 5 international branches throughout the world and manages sales in more than 80 countries. The company's experts communicate and interact constantly with the major international regulatory authorities and cooperate on the update of all the main pharmacopoeias. indena.com.
