WHAT IS CASPEROME®?

CASPEROME® is a purified mixture of triterpenoid acids from the gum resin of *Boswellia serrata*.

Given the **poor bioavailability of these compounds**,¹ Indena has formulated the extract with **Indena Phytosome® technology** to optimize their absorption.

Boswellia actives have been demonstrated to be **effective to support a healthy inflammatory response functions** including those that occur in the **bowel, joints, bones and respiratory airways**, with a mechanism of action that involves the **beneficial modulation of the natural inflammatory response acting on multiple targets** including prostanoid synthesis (mPGE2S), protein degradation (caspases), transcription factors (Nf-κB) and inflammatory enzymes (5-lipoxygenase).

SPECIFICATIONS

CASPEROME® is standardized to contain: **≥25% of triterpenoid acids** by HPLC

RECOMMENDED USE AND DOSE

CASPEROME® is a yellow powder for use in nutritional supplements.
Recommended dose: 250-500 mg/day

TRADEMARKS

CASPEROME® is a trademark of Indena S.p.A. and its logo and usage guidelines are available from Indena.

CASPEROME® contains the **full bouquet of boswellic acids present in the natural gum resin**, including **β-boswellic acid**, the triterpenoid scientifically acknowledge for playing the major role in the beneficial effects of Boswellia: **this makes all the difference with the other Boswellia extracts on the market, containing only AKBA.**

Indena Phytosome® technology is proven to optimize all the bowellic acids (including β-boswellic acid) contained in **CASPEROME®**.²

CASPEROME® is able to **effectively support musculoskeletal system both in acute and chronic situations** - including tendons challenges and common sports injuries - with **improvements on: ache relief (VAS), joint function, optimized need for standard support, joint inflammation biomarkers**.³⁻⁵

CASPEROME® has also been shown to **support gut health with demonstrated benefits in common gut discomforts** (compared to the best available managements) in acute and chronic scenarios. **Ameliorations were observed both as objective and subjective clinical symptoms: intestinal discomfort like watery stools, bowel movements, cramps, inflammation biomarkers, need for further standard supports, recovery time, quality of life**.⁶⁻⁹

Thanks to its **full spectrum of Boswellia serrata gum resin acids**, captured and preserved through Indena Phytosome® technology and precise standardization, **CASPEROME®** represents a **scientifically validated solution to support body function for comprehensive well-being during the life course**.

Its benefits can potentially extend across multiple health areas, including **physical recovery after exercise and minor injuries, intestinal balance under conditions such as stress, long term discomforts or standard therapies (such as GLP-1 products), respiratory wellness during allergen exposure periods, and the relief from visual specific discomforts**.

CASPEROME® stands out as a **unique, natural support for many modern lifestyle challenges**.
