QUERCEFIT®
QUERCETIN INDENA PHYTOSOME®

HIT THE MARK TO SLOW DOWN CELL AGING

Quercefite® is a smart health-food ingredient designed to support healthy aging where it begins – at the cellular level.

Acting as a senolytic, it helps the body mitigate cell damage and dysfunction, key factors behind physiological age-related decline and inflammatory processes. Enhanced by Indena Phytosome® technology, it ensures optimized bioabsorption and efficacy compared to unformulated quercetin. Developed with strong commitment to sustainability,

Quercefite® is produced in an ISO 14001 and ISO 45001-certified plant where CO₂ emissions are reduced, the energy transition is underway, and occupational health and safety are a priority.

Target cellular senescence to protect overall vitality, for timeless quality of life.
